## THE TAR SANDS COME TO ONTARIO

Resistance, education and alternatives

**Saturday, November 17, University of Toronto**

### PROGRAM

- 10:00 The tar sands' impact: environmental injustice at home and abroad.  
Workshops on: Tar sands in our communities; tar sands and workers; climate justice and the Global South; tar sands and structural causes of climate change; legal initiatives against tar sands injustice.
- 12:45 Resistance, solutions and solidarity: Indigenous leaders, labour, and allies.  
Speakers: Art Sterritt, Wes Elliott; Dave Coles.
- 3:00 Stopping the Pipelines: A Realistic Goal  
A People's Assembly with action-oriented breakout sessions.

### What is Line 9?

First Nations' defence of their lands is spearheading resistance across Canada to the tar sands menace. In Ontario, this threat is posed by Enbridge's Line 9 pipeline, which could soon be pumping corrosive and toxic tar sands across the province.

Line 9 cuts through Toronto, north of Finch. Tar sands in Line 9 would violate indigenous land rights, menace natural environments, and threaten our communities across the province. And exploitation of Canada's tar sands escalates climate change, posing a deadly threat to all the world's peoples. No Line 9!
